'How to reduce food waste produced by cohabitating users.'

FINAL SELECTION

Sharing platform

Unreliable source. Not guaranteed supply or demand

Pre-portioned food kits

Not a sustainable option. Individual solution not communal

Lists + expiry tracker

Composting program

Depends on local set-up. Food is already wasted but repurposed. High effort, low convenience.

Meal-planning + meal-prep

Individual solution, depends on preferences.

Food bank / community
fridge donations

Higher authorities and regulation at play. Part of solution but not as an everyday efficient tool.

Grocery Receipt Logger

Organization techniques
+ behavioural tools

One time solution fix, no continuous requirement.
